

Kevin Quoc Tan Lam | Software Engineer

kevin.quoct.lam@gmail.com | 206-486-0981 | [portfolio](#) | [linkedin](#) | [github](#)

Software Engineer skilled in full-stack web development with a foundation in mechanical engineering. Energized when using creativity and technical judgement to solve problems.

TECHNICAL SKILLS

Programming Languages: Javascript, Typescript, HTML, CSS, Sass, Rust

Database & Backend: Nodejs, Postgresql, Prisma, Insomnia, Postbird, Sequelize

Frameworks & Libraries: React, Nextjs, Bulma, Tailwind, Express, Redux, Cheerio, jQuery

Tools, Platforms & Misc: Git, Github, Vercel, Figma, Firebase, OpenAI, npm, Arduino

TECHNICAL PROJECTS

Quality Chords – Guitar chord database & web app tool | [Project Link](#) - [Write up](#)

- Developed tool to teach guitar chords by movable chord quality shape.
- Features: admin data operations via RESTful API, renders chord data as SVG diagrams.
- Used to teach students in private guitar lessons

Bowlerator – Business landing page | [Project Link](#) - [Write up](#)

- Designed brochure landing page to emphasize taking action for a food bowl generator app.
- Features: Product story UX emphasis, designed from wireframed layout
- Prototype template for freelance work building a landing pages.

Worm's Eye View – Garden plant suggestion algorithm | [Project Link](#)

- Group project manager for plant recommendation app based on user data.
- Led daily stand-ups and managed code integration on a team of four.
- Developed plant suggestion algorithm and implemented interactive visual garden plot.

EXPERIENCE

21 Acres - Woodinville, WA

7/2022 - 3/2023

Utility Energy Analyst, contract

- Identified energy savings by analyzing utility data via eGauge platform for 21 acre property.
- Created automated notification system for monitoring peak energy demand charges.
- Managed data using local utility, energy star, LEED arc skoru technology platforms.

BOEING - Everett, WA

2013-2021

Program Manager, Structural Analysis Engineer (2016-2021)

Structural Analysis Engineer (2013-2016)

- Program manager of interdisciplinary 5+ person team for Landing Gear Drop Test program supporting airplane certification, resulting in on time test report delivery.
- Responsible for writing test plan, resolving technical concerns, on-site test support, communicating with external clients, and certification deliverables.
- Managed rapid development of 15+ part mechanism from early concept to production.
- Responsible for structural analysis, design integration, engineering drawing review, and thousand-page analysis documentation.

EDUCATION

Fullstack Academy | *Software Engineering Certificate* – 550 hours | 08/22 - 12/22

University of Hawaii, Manoa | *B.S. Mechanical Engineering* | Grad 2013
